

GUILHERME ALMEIDA

ABOUT ME

I'm a 23-year-old Full stack web and mobile developer based in Manaus, Brazil. Currently focused on React + Next, Node + Nest and UI/UX design but with knowledge in several other technologies as well.

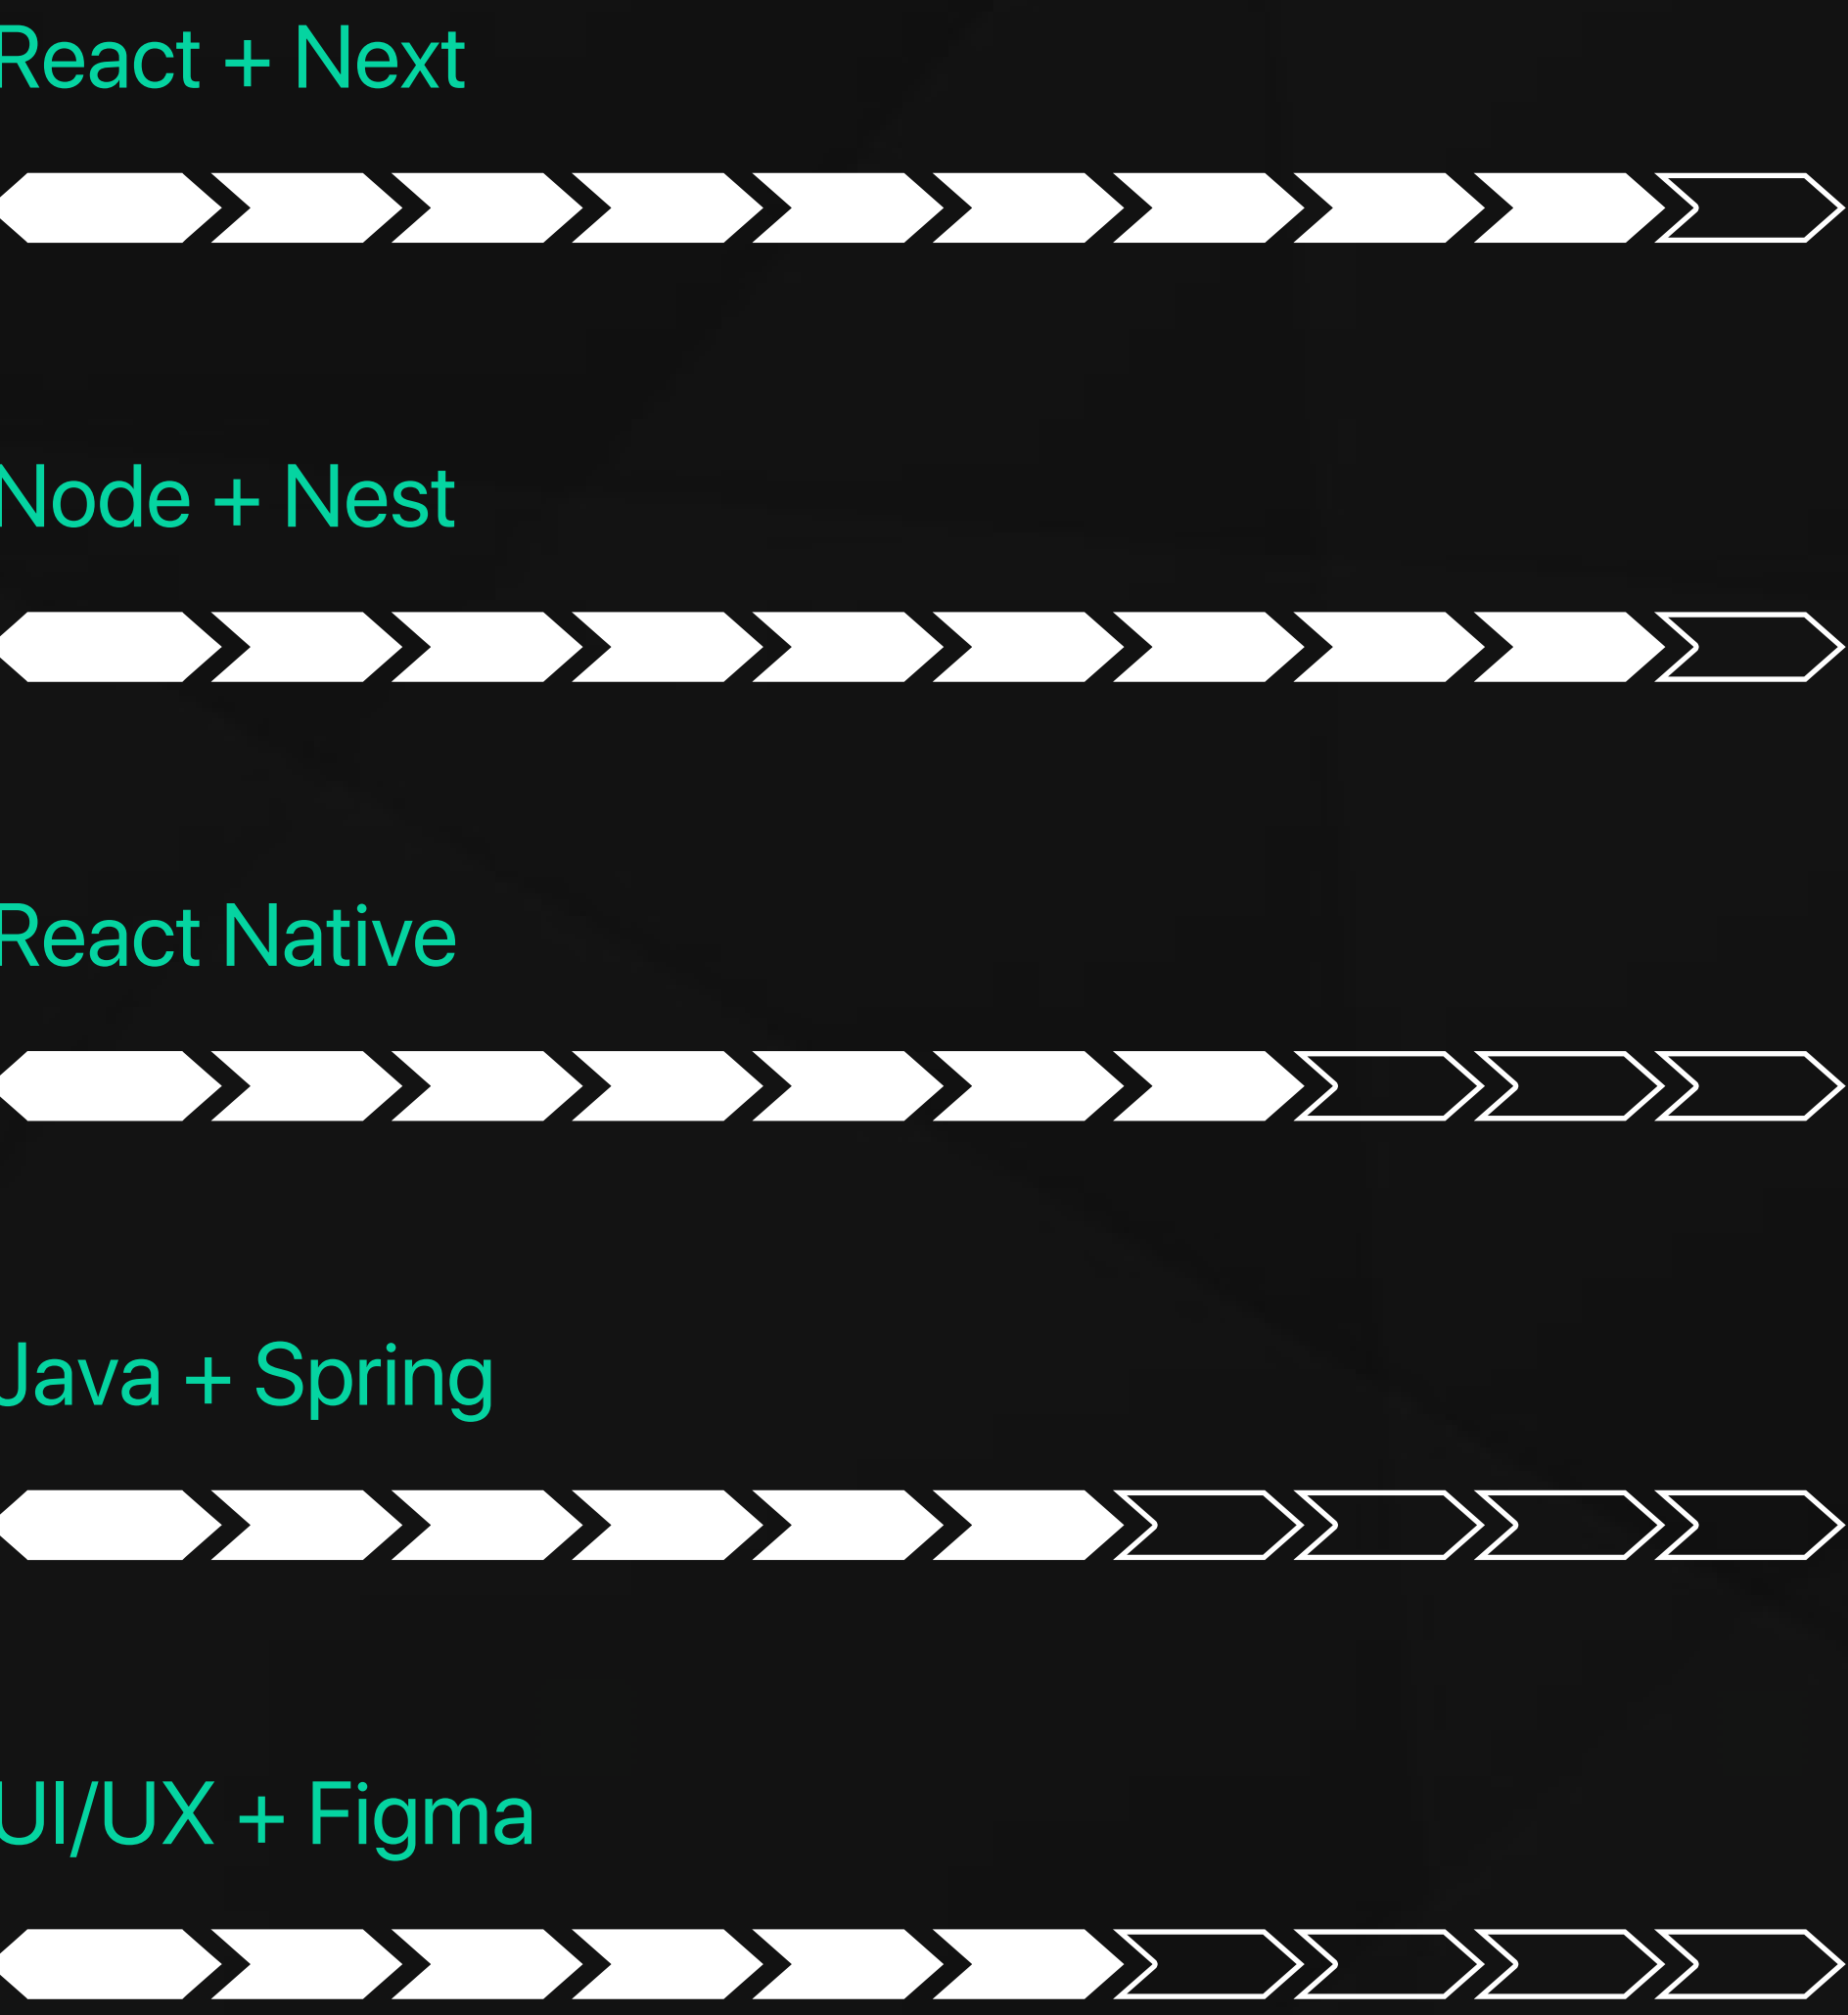

I have a Technical Degree in Informatics with emphasis on Software Engineering and a bachelor's degree in Software Engineering from the Federal University of Amazonas, totaling 8 years of academic experience.

While most of my experience lies in front-end development, I consider myself to be just as good in other fields such as a back-end development and software architecture and am looking for opportunities where I can use more of my knowledge and skills.
