

JOÃO GUILHERME DE OLIVEIRA ALMEIDA

ABOUT ME

I'm a 21-year-old Full-stack web and mobile developer based in Manaus, Brazil, and currently focused in Front-end development in general. Currently working with React + Next and Node + Express but with knowledge in several other technologies as well.

I have a Technical Degree in Informatics with emphasis on Software Engineering and am currently at my 7th semester of my Software Engineering Bachelor's Degree course which I should be finishing by Q4 2022.

- 

State University of Amazonas - Certificate Course in Embedded Android Development
January 2021, May 2021

WORK EXPERIENCE

- 

PRODAM-AM - Software Development Intern
June 2018, December 2018
 - While working in this company, my main role was to maintain legacy systems written in Java, CakePHP and Laravel, doing tweaks and implementing new features on demand.I also developed tools to automate processes such as mail sending and data mining on excel sheets, most of them which I wrote in Java.
- 

CREA-AM - Full Stack Developer
May 2019, June 2021
 - As a intern, I started working both as an I.T support technician and a developer. The I.T support role consisted mostly of maintenance of computers, servers and printers (one of which was a DataCard printer), while my role as a developer was to create new applications for the company, some of them on demand and most of them which me and my supervisor had designed to automate processes and increase productivity of the whole company.The applications were written in several languages and used several different tools, such as CakePHP, React, Node, and even Scrappy, with the team having full autonomy to choose which tools to use in each project. For my efforts starting the development division in my department, I got hired as a full-time employee.
- 

Capgemini - Full stack Developer
June 2021, Current
 - Full Stack Developer working alongside several other developers, designers and product managers in order to deliver high end digital solutions for our clients. Our main client in this company is Banco do Brasil, which is the second largest bank in all Latin America.My main project while working in this company was Banco do Brasil's investments page, where I worked mostly as a front-end developer.
